

LATITUDE SERIES: A MODERN DESIGN TO FUEL YOUR FUTURE!

2021 is an exciting year! Universal Engineering and Consultancy Services Ltd, your one stop destination to all Gilbarco Veeder Root Fuel Dispensers will be introducing more unique and sleek designs of Gilbarco dispensers this

year. As a petroleum industry solutions provider, we set out to offer ultimate solutions keeping in mind our customers who will invest in the future of their service station.

A new chapter of forecourt excellence is upon us! We are excited to show you another perfect blend of enhanced performance and sleek design of pumps that will draw vehicles to your station. UECL introduces an addition to the Latitude Series Pumps – Latitude LS-100 and Latitude LS-300.

The Latitude series from Gilbarco Veeder-Root offers a comprehensive suite of features to guide your business into the future. The Latitude series enables two flowrate options with Opti-flow hydraulics which gives 10% increase in suction lift and a 7% increase in average flowrate comes in four configurations with a maximum number of 4 grades and 8 meters. The high contrast LCD display with direct sunlight readability which gains customer's trust and proves to customers they are getting what they've paid for with bold digital numbering. Power fluctuations should be the least of your problems as the Latitude series was engineered to tolerate harsh voltage fluctuations with an enhanced power filter which minimizes breakdown.
